## Mikron Service Solutions

Mikron Service Solutions offers an efficient inspection of the current status of your machine in a technical evaluation. A Mikron service technician inspects the machine at your facility based on a checklist. You receive a written report outlining the condition of the machine as well as recommendations for maintenance and the replacement of worn parts.

### OUR SERVICES

- Checklist based analysis of the system's current condition
- The Mikron service technician will inspect your system on-site in one day
- Joint evaluation of checklist
- You will receive a written report outlining the condition of the machine, as well as recommendations regarding maintenance, the replacement of worn parts, or a complete machine overhaul

### YOUR BENEFITS

- Clarity on the current machine status
- Reduction of unpredictable machine failures
- Avoidance of repair costs through damage detection
- Early diagnosis and advice on optimization and upgrade
