

Mikron ATW-10

 **MIKRON**

Automatic Test Writer

Efficient writing test with ATW-10 from Mikron

Writing test machine type ATW-10

Machine for testing the writing quality of cartridges. This machine tests simultaneously ten refills in different writing angles between 60 degrees and 90 degrees. This registering mechanism allows the reading of the writing distance in "meters" by means of a device coupled directly with the paper feeding bobbin. The driving motor is not subject to current fluctuations so that an accurate speed is absolutely guaranteed.

Special features of ATW-10

- 10 rotating supports
- adjustable writing speed and paper feed
- writing angle variable from 60° to 90°
- automatic oscillation of $\pm 3,5^\circ$ to $\pm 7^\circ$
- total writing distance adjustable

Support carrier arm

Direct fillers and refillers

Ball pen and refill supports
